Please enter the codepoint ID of a Unicode character (e.g. "U+3164", "U3164", "3164"), a character itself (e.g. "A", "😀", "Ψ"), or parts of a characters name into the search field. You can also use our text decoder tool to find out what Unicode characters are in your text.

Do you want to know how to send invisible WhatsApp messages?

the text decoder tool.
